

# CompTIA™ Certification Training: A+, Network+, Security+

## Our Program

This program will thoroughly train your local workforce on CompTIA™ A+, CompTIA™ Network+, and CompTIA™ Security+ concepts.

CompTIA™ A+ topics covered in the program include motherboards, memory, processors, video, storage media and devices, printers, operating systems, networking, virtualization, mobile devices, and various aspects of security.

Gaining CompTIA™ A+ certification assures employers and computer owners that a PC technician has the requisite knowledge to build, upgrade, optimize, troubleshoot, and repair personal computer (PC) systems.

Students will also work toward a Network+ certification, gaining proficiency as a network technician. They'll master basic networking concepts and learn about network design, security, routing, and switching.

To build onto these skills, students will work towards gaining their CompTIA™ Security+ certification, to demonstrate additional knowledge in security concepts such as attacks and mitigation, security applications, risk assessment, disaster recovery, incident reporting, and vulnerability assessment.

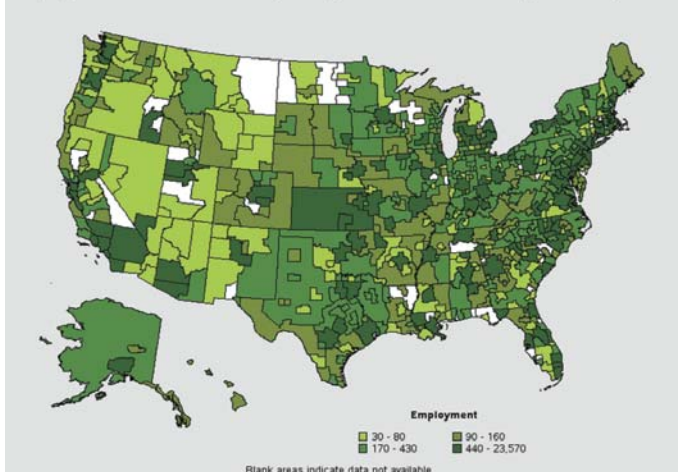

### Certifying Exam:

CompTIA™ A+ Exams 220-801 and 220-802  
CompTIA™ Network+ Exam N10-006  
CompTIA™ Security+ Exam SY0-401
