

Android Application Developer

Our Program

This program gives local students Android Application development experience. Throughout the program, they will learn how to develop basic Android Applications using the Android ADT framework. This program will take students through the basics of Android Framework to working with complex applications.

Once they have completed the program, students will be equipped to start helping local employers create applications for Android Devices. They will have foundational knowledge, and with additional study time and practical application, can prepare to develop higher-level applications and games.
