

Carpentry

Our Program

Explore what is like to work in construction and learn all the necessary tools and skills that will help create a successful career in the industry. For students that are comfortable working with a hammer or saw will excel with the added knowledge of safety and operational skills.

Students will learn basic math needed on the jobsite, how to read a blueprint, the safe and effective way to use power tools, and how to construct a home from the floor to the roof. Students will also have the chance to put their skills to work in three hands-on workshop projects. By the time the program is complete, participants will be ready for an entry-level position in the construction industry.

Labor Stats

Average median pay:

\$40,820

which is higher than the national median income across all occupations
