

Cybersecurity

Online crime costs the global economy hundreds of billions of dollars a year, so it should be of no surprise that **cybersecurity is the fastest-growing sector of IT** by a significant margin. **Job postings have gone up** nearly 75% in the past five years, and there are an estimated **one million unfilled openings** in the industry. In addition to job security, cybersecurity positions offer **excellent earning potential, opportunity for advancement**, and new skills and technologies to learn as threats become more sophisticated.

Whether you are considering a career in cybersecurity or simply interested in expanding your options as a technology professional, **we offer a bounty of training and certification courses in this exciting field.** The Department of Defense (DoD) is the certification framework by which the cybersecurity industry sets its standard and we've mapped our courses to that framework.

OUR COURSES

- Information Security Training
- IT Security Survival Training
- Information Security Master Certification Training
- CompTIA Advanced Security Practitioner (CASP)
- CompTIA™ Security+ Certification Training
- SSCP Systems Security Certified Practitioner
