

STUDENT SUCCESS STORY

ED2GO'S ONLINE COURSES HELP STUDENTS START THEIR DREAM CAREERS

GAINING THE SKILLS TO START A NEW CAREER

CLARIBEL G. was unhappy with her job at a fast-food restaurant and wanted to enter the medical field but was unsure where to start. After a quick Google search, she found the **Certified Phlebotomy Technician (Voucher + Lab Included)** course offered by Morton College.

She was most attracted to the idea that she could obtain a partial phlebotomy license and later upgrade to a full license by completing an internship.

After completing the course in two months, Claribel passed her certification exam and received a job offer from Grifols Plasma as a Plasma Processor 1. She is now excelling as a **Phlebotomist 1**, having been promoted within six months. Her superiors noticed her performance, and today, she has the unique opportunity to train new hires, shaping the future of the company.

“Thank you, ed2go. You helped me find the job I always dreamed of. I am more satisfied with my work-life balance now.”

CHALLENGE

Claribel struggled to find time and motivation to study while working in a job she did not like.
