

Human Anatomy and Physiology

This course will introduce the physical structure of the body's organ systems and explain how the structures of the body work, known as systemic anatomy and physiology. It will also examine how the different organ systems work together to keep you alive.

Human Anatomy and Physiology II

This course will build on the knowledge you gained in Human Anatomy and Physiology I. It covers the basics of histology, the different senses, cellular metabolism, important chemicals in the body, and events that occur during the human life span from prenatal development to late adulthood.

Human Physiology Series

- Human Anatomy and Physiology
- Human Anatomy and Physiology II

Introduction to Algebra

Understand how algebra is relevant to every aspect of your daily life and become skilled at solving a variety of algebraic problems.

Introduction to Biology

Learn how cells and DNA determine the structure and function of the human body and get a foundation for a career in the healthcare or medical professions.

Introduction to Chemistry

Gain a solid foundation in the basics of chemistry and see how everything that goes on in your body depends on a chemical reaction.

Introduction to Statistics

Improve your understanding of data and learn how to develop graphs and charts.

Math Refresher

Gain confidence in your basic math skills and start using math to your advantage.
