

PATIENT CARE TECHNICIAN TRAINING for English Language Learners

Together with EnGen, a career-focused virtual English language learning platform, we've created a Patient Care Technician career pathway for Spanish speakers. Unlike traditional ESL programs, the English instruction is job-specific and based on the student's real-world needs.

HOW IT WORKS

- Online, self-paced training with 18 months to complete
- Career-aligned English instruction tailored to a student's proficiency level
- Proficiency Assessment (PA) offered every 60 days to track improvement
- Progress to the Certified Patient Care Technician (PCT) course upon scoring High Intermediate
- 6-month access to the entire EnGen platform, including live, online classes

KEY BENEFITS

- **Easy to Access:** The EnGen app works on a phone, tablet, or computer with the option to toggle between Spanish and English.
- **Personalized:** Students build English skills relevant to their life, proficiency level, and career goals.
- **Career Pathway:** Industry-aligned English instruction accelerates students' readiness for workforce training programs and industry certification.
- **Industry Credentials:** Students will be prepared for the Certified Patient Care Technician (CPCT) national certification exam offered by the National Healthcareer Association (NHA).
